# Rhulani Mashala

**SOFTWARE ENGINEER | AI ENGINEER**

South Africa | Open to Remote / Hybrid Roles | nascode.dev@gmail.com

GitHub: https://github.com/Nas103 | Portfolio: https://nas103.github.io/threeJS_portfolio/

## PROFESSIONAL SUMMARY

Software Engineer and AI Engineer with 3+ years of professional software-development experience across AI voice agents, full-stack web applications, APIs, automation and machine learning. Strong hands-on background in Python, JavaScript/TypeScript, Node.js, React, REST APIs, Git and Linux, with experience taking requirements through implementation, debugging, testing and delivery. GitHub portfolio includes AI, SaaS, retail, backend and web projects.

## CORE SKILLS

**Languages:** Python, JavaScript, TypeScript, SQL, Shell

**Frontend:** React, Next.js, HTML, CSS, JavaScript, responsive web development

**Backend:** Node.js, REST APIs, webhooks, backend services, API integrations

**AI / ML:** AI applications, AI agents, voice agents, machine learning, AI pipelines, AI-assisted development

**Systems / Tools:** Linux, Git, GitHub, troubleshooting, debugging, automation, third-party integrations

**Engineering:** Full-stack development, software design, testing, root-cause analysis, maintainable code, Agile/collaborative workflows

## PROFESSIONAL EXPERIENCE

### Nexus AI Systems | AI Voice Agent Engineer (Freelancer)

*May 2026 - Present*

- Develop AI voice-agent solutions for real business workflows, combining software engineering, APIs, automation and AI services.
- Build and integrate backend services, REST APIs, webhooks and third-party systems to connect AI agents with business applications.
- Design practical application workflows and troubleshoot integration, API and runtime issues to deliver reliable client solutions.
- Use Python, JavaScript/TypeScript, Node.js and modern AI development tools to prototype, implement and refine software features.
- Work independently from technical investigation through implementation, testing and delivery against client requirements.
- Use AI coding assistants productively while reviewing generated code for correctness, maintainability and production suitability.

### Heybash | Software Engineer

*March 2023 - January 2026*

- Developed full-stack web applications and software features using JavaScript, modern frontend technologies and APIs.
- Built and integrated application functionality across frontend and backend components, with attention to maintainability and responsive user experiences.
- Investigated bugs and implementation issues, identified root causes and delivered fixes through collaborative development workflows.
- Worked with Git and modern software development practices while translating requirements into working application features.
- Contributed to API integrations and production-oriented web development in a professional engineering environment.

### HexSoftwares | Machine Learning Intern

*January 2023 - March 2023*

- Built and experimented with Python-based machine learning solutions and AI pipelines.
- Worked through data preparation, model development, evaluation and iterative optimization.
- Applied analytical problem solving and Python programming to practical machine learning tasks.

## SELECTED PROJECTS

**Lily-s** | *AI-powered retail web application + embedded mobile app*

- Built a complex retail-store application with AI-powered functionality across the web experience and embedded mobile application.

**intel-ai / INTELIG-AI** | *AI / SaaS applications*

- Developed large AI and SaaS application projects spanning application workflows, AI functionality and user-facing product features.

**AI-Coding-Tutor** | *Python*

- AI-focused coding project demonstrating Python development and software engineering practice.

**threeJS_portfolio** | *JavaScript / Three.js*

- Interactive portfolio project demonstrating modern JavaScript development and web application presentation.

**ALX backend projects** | *Python / JavaScript / Linux*

- Coursework and engineering projects covering backend development, higher-level Python, JavaScript and system engineering with Git-based workflows.

## EDUCATION & CREDENTIALS

**Software Engineering Bootcamp / Certificate | ALX / Holberton**

*November 2023 - September 2024 | Backend specialization*

**N4 Systems & Web Development | ATTI College**

*Credential completed*

**Diploma in Accounting Sciences | UNISA**

*In Progress*

**Professional Certificates | IBM, AWS, Google, Meta**

*IBM AI Engineer / AI Developer; AWS AI Practitioner; AWS Cloud Practitioner; Google IT Support; Meta Back-End Development*
